OPTOMETRY FELLOWSHIP PROGRAMS AT RADHATRI NETHRALAYA

Are you a passionate optometrist ready to specialize and make a profound impact? Invest in your future with our cutting-edge fellowship programs, designed to hone your skills and position you at the forefront of optometric care.

We at Radhatri Nethralaya are excited to announce new basic and advanced fellowship courses for eye care practitioners in critical and evolving areas of eye care.

BASIC OPTOMETRY FELLOWSHIPS

CLINICAL OPTOMETRY FELLOWSHIP

Overall clinical training in comprehensive eye examination including retinoscopy, slit lamp examination, applanation tonometry, diagnosis, dispensing and so on.

FELLOWSHIP IN OCULAR DIAGNOSTICS

Dive deep into the latest imaging technologies and diagnostic techniques for anterior and posterior segment assessment and enhance your ability to detect various ocular conditions.

FELLOWSHIP IN COMMUNITY EYE SCREENING

Excellent exposure to screen for refractive errors, diabetic retinopathy, glaucoma, ROP and other ocular conditions and provide early treatment.

BASIC CONTACT LENS FELLOWSHIP

Learn about contact lens specific eye examination, lens selection and fitting of soft spherical and toric lenses, fitting of rigid corneal lenses, fit modification and troubleshooting. Become an expert in routine contact lens practice.

FELLOWSHIP IN MYOPIA MANAGEMENT - TRACK AND TACKLE:

Address the global myopia epidemic. Learn about examination for myopia, evidence-based strategies, treatments, and patient education techniques to effectively manage and slow myopia progression.

ADVANCED OPTOMETRY FELLOWSHIPS

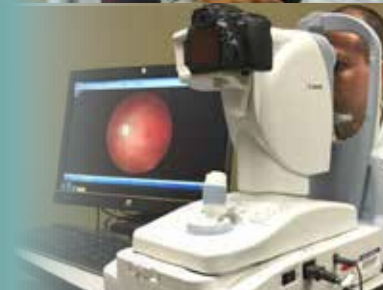

FELLOWSHIP IN RETINOPATHY OF PREMATURITY (ROP) SCREENING

Become a vital part of the team safeguarding the vision of our most vulnerable patients. Master the diagnostics, monitoring, and collaborative care essential for ROP.

ADVANCED RETINAL DIAGNOSTICS

Dive deep into the latest imaging technologies and diagnostic techniques for comprehensive retinal assessment. Enhance your ability to detect and manage complex retinal conditions.

LOW VISION EXAMINATION AND REHABILITATION

Empower individuals with visual impairments. Develop expertise in prescribing assistive devices, rehabilitation strategies, and improving quality of life for low vision patients.

PAEDIATRIC OPTOMETRY AND BINOCULAR VISION

Shape healthy visual development for children. Gain specialized knowledge in pediatric eye examinations, amblyopia, strabismus examination and advanced binocular vision therapies.

ADVANCED CONTACT LENS FELLOWSHIP

From routine contact lens fits to complex specialty lenses (toric and multifocal lenses, rigid corneal lenses, scleral lenses, orthokeratology lenses), become a go-to expert in all facets of contact lens practice.
